

Community Service School Goal

For the 2009-10 school year the Sussex County Technical School has a school wide goal to work toward increasing student participation in Community Service Efforts. On November 1 our students participating in an event run by the Juvenile Diabetes Research Foundation. Sussex Tech had the largest participating group with students assisting with setup, cleanup, manning tables, as well as participating in the walk raising money for research.

Participating clubs included members of National Honor Society, Key Club, Spanish National Honor Society. We also had a large number of Fall Student Athletes participate from Girls Soccer, Cross Country, Cheerleading, Football, and Boys Soccer.

Thank you to all of our students and staff members who took part in this great event.
